I asked you on Reddit to not let your banker bosses try to kill bitcoin. It is clear now that they have. Unfortunately for you and regulators everywhere, you will be unable to enforce your will on the universe. Your intention to regulate people sharing information and doing math is unfeasible. Your banker bosses will not be able to leverage their government henchman to preserve their dominance any longer. Your regulations will fail. Please reconsider them.

MONEY IS OVER!

[IF YOU WANT IT](#)

The causes of my servitude can be traced to the tyranny of money.
-Serj Tankian
