Hello.

My name is Jackson Mackerel, and I recently read the proposed BitLicense. I have quite a few issues with what I read. The proposed requirements for obtaining such a license are grotesquely invasive. This goes against so much of what cryptocurrency stands for. This also goes against what the United States of America stand for. A regulation like this has the very real possibility of irrevocably crippling the virtual currency economy. I will admit that I am neither a lawyer, nor an economist. But I, a humble citizen, ask you to please keep this regulation from taking effect as it stands currently.

Thanks,
Jackson Mackerel.
