## OPEN PUBLIC MESSAGE & COMPLAINT ##

Dear Superintendent Lawsky (And those it concerns) in regard to the "Bit License"

Sir.

Before i begin with this letter i will try to make one point clear and in mature manner without trying to make this a political stunt.

Most of the hand crafted protests that i have seen online make very good use of the point they are trying to make; That said "Bit License" is a bad idea, I agree with many aspects of most (if not all) of what they try to convey.

This is not a protest...

Put simply it is a Complaint.

I have not been with this "Bitcoin" idea for very long however what i have seen hints of a currency system that has the potential to unite us all, we are too concerned (And sometimes confused) with what names and borders really stand for.

As with any new concept there is always the good and the bad side to every coin (In this case oddly; Bitcoin)

This License idea will only prove our point and drive away the very core reason for the Bitcoin currency.

Do you want to drive away jobs, ideas, work force, Legit commerce

You should embrace this new currency NOT try to limit such or destroy the very spirit of what it means to truly be an American or am i talking to the wrong person.

If that will not be reason enough then let me share this;

We are viewing this "Bit License" proposal as a violation of the following...

4th Amendment - Unreasonable Search & and Seizure

10th Amendment - Rights of the States & People

11th Amendment - Judicial Limits

14th Amendment - Due Process

Rights to Privacy - Passable preclusions to the HIPAA Act

-

If any of what i have said has made a difference please call this proposal off before you ruin any chances for the Bitcoin to flourish not only in New York but all over.

-Richard Rivenbark
