

June 15, 2013

To the Governor and Legislature:

I am pleased to submit the 2012 Annual Report of the New York State Department of Financial Services, as required by Article 2, Section 207 of the Financial Services Law.

Throughout 2012, the Department carried out its mission to protect consumers and to promote the development of sound, fair financial services. The Department's work is varied and is detailed in the report. Our efforts have, for example, included:

- ***Reforming the force-placed insurance industry*** – A Department investigation revealed that homeowners wrongfully paid millions of dollars for insurance policies as the result of price-gouging and other unfair business practices. The Department reached agreements with 100 percent of the New York force-placed insurance market. The insurers agreed to pay fines, make restitution to homeowners and reform the way force-placed insurance is purchased.
- ***Stopping international money-laundering*** – Standard Chartered, a major British bank, agreed to pay New York a \$340 million fine to settle claims that the bank lied to regulators and laundered hundreds of billions of dollars for Iran.
- ***Helping New Yorkers recover from storm losses*** – The Department acted aggressively and proactively by undertaking numerous storm-recovery initiatives after Storm Sandy caused massive destruction to thousands of homes and businesses. The Department worked with insurers to make sure claims were adjusted and settled quickly, and the Department worked to change national lending rules so that banks and mortgage servicers could make insurance settlement funds more readily available to support homeowners' rebuilding efforts.
- ***Saving nearly \$500 million for health insurance consumers*** – The Department required insurance companies to reduce their rate increase requests by an average of approximately five percent, which saved New York consumers an estimated \$400 million in potential premium increases. The Department also required several insurers to refund \$95.5 million of premiums paid back to the policyholders.

As its charter instructs, the Department has and will continue to work aggressively to advance consumer protection and foster the growth of a fair, robust financial services industry. I hope you find the report useful.

Respectfully submitted,

Benjamin M. Lawsky
Superintendent

Department of Financial Services

Annual Report

to the Governor and Legislature

For the year ended December 31, 2012

Benjamin M. Lawsky, Superintendent

INTRODUCTION

This is the second Annual Report of the New York State Department of Financial Services (DFS), which reviews the Department's activities in 2012, and developments in the financial services industries regulated by the Department.

In 2011 Governor Cuomo identified a need to modernize and close the regulatory gaps that had contributed to the financial crisis, so he proposed creating DFS to oversee the broad array of financial products and services in the market. This consolidation would leverage the combined financial expertise of the former Insurance and Banking Departments to guard against systemic risk, while also streamlining regulation and operations to improve efficiency.

The Financial Services Law was introduced and passed as part of Governor Cuomo's 2011 budget. In May 2011, work began to integrate the Banking and Insurance Departments, and the merger became effective on October 3, 2011.

The Department is responsible for supervising and regulating the activities of nearly 1,700 insurance companies with assets exceeding \$4.2 trillion and nearly 1,900 banking and other financial institutions with assets of more than \$2.9 trillion. The Department is organized into five divisions:

The **Insurance Division** supervises all insurance companies that do business in New York. The Division includes the Property, Life and Health Bureaus.

The **Banking Division** supervises, through chartering licensing, registering, and examining safety and soundness of banking and other financial institutions. The division is composed of the following groups: Foreign & Wholesale Banks, Community & Regional Banks, Licensed Financial Services, and Mortgage Banking

The **Financial Frauds and Consumer Protection Division** is responsible for protecting and educating consumers and fighting consumer fraud.

The **Capital Markets Division** actively monitors the latest developments and products in the financial services marketplace so that the Department can better understand and regulate complex and rapidly changing financial products and services. While Capital Markets is a service arm to the Department's other operating divisions, it also has primary supervisory responsibility for financial guarantors and state and municipal retirement systems, as well as other pension plans. The Division includes the Examinations Bureau and the Research and Analysis Bureau.

The **Real Estate Finance Division** is responsible for regulating all real estate and homeowner issues, as well as such financial services as title insurance and mortgage insurance.

Data in this report are for the year 2012, unless stated otherwise. Financial data for the Department is for fiscal year 2011-2012, during which the Insurance and Banking Departments were separate entities until October 3, 2011.

To reduce reproduction costs, data that is posted on the [Department website](#) in the normal course of business, and that has been included in prior reports, is now instead referenced on the Department website

MAJOR ACCOMPLISHMENTS

Since its inception, the Department has worked to protect consumers and promote a thriving sustainable financial services sector that creates jobs for the long term. The highlights of some of that work are below.

PROMOTING STRONG, SMART, TARGETED REGULATION

Standard Chartered Settlement

On September 21, 2012 the Department fined Standard Chartered Bank (SCB) \$340 million after a Department investigation revealed that SCB conspired with Iran to hide roughly 60,000 transactions, totaling approximately \$250 billion, that cleared through its New York City branch between 2001 and 2007. In addition to the fine, SCB agreed to install a monitor for two years to evaluate the bank's money-laundering risk controls and report on the bank's progress directly to the Department. SCB also agreed to install personnel in its New York branch to oversee and audit its offshore money-laundering due diligence processes.

Reforming No-Fault

At the Governor's direction, the Department implemented an initiative to stop deceptive doctors and shut down medical mills by issuing a new regulation that will enable the Department to ban doctors from the no-fault system if the doctors engage in fraudulent and deceptive practices. The regulation implements a 2005 law that gives the Department the power to regulate doctor participation in the no-fault system.

An investigation by the Department found evidence of doctors and other practitioners providing unnecessary treatment to car accident victims as well as doctors "renting" their tax ID number to fraudulent medical practices that submit fake bills to insurance companies.

In addition to the new regulation, the Department is now examining information collected from 135 medical providers who the Department contacted after finding that their billing practices raised concerns. The Department is examining the information to investigate the providers' no-fault insurance billing practices and determine whether the providers are the true owners and operators of their businesses.

Ensuring the Fairness of Capital Requirements for Community & Regional Banks

On October 22, 2012, the Department submitted a comment letter on proposed Basel III bank capital rules to the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), and the Board of Governors of the Federal Reserve System on the agencies' three notices of proposed rulemaking that would replace the current capital rules for U.S. banking institutions. The Department's primary concerns, as expressed in the comment letter, are that the extra burden and cost of compliance and surveillance imposed by the complexities of the proposed risk weighting to community banks, if adopted, will not bring commensurate benefits to the economy or stability to the financial sector. While the Department supports stronger capital requirements, we urged the agencies in our

comment to exempt community banks from the proposed risk weightings and to simplify the risk weightings that would apply to most U.S. banks.

ENCOURAGING THE GROWTH OF INDUSTRY

Enhancing the New York State Bank Charter

One of the Department's key objectives is to promote the New York State bank charter. Banks recognize that having the State charter provides greater potential for dialogue with regulators on issues important to the banks. Banks also recognize the wealth of knowledge the Department has on local consumer issues. The New York State charter allows banks to be supervised by regulators who are more accessible, flexible and responsive than their federal counterparts due to a greater understanding of their home markets. By being more closely attuned to local institutions' needs and markets, state regulators are better able to provide supervisory guidance and support during challenging economic periods.

The State Bank Charter Advisory Board was created pursuant to Section 205-b of the Financial Services Law to assist the Department in encouraging the growth in state-chartered banks. The Board advises the Superintendent on ways to maintain the state charter as a viable and attractive option for banking institutions. It consists of nine members, eight drawn from different segments of the banking community, and one consumer representative, as specified by the statute.

In 2012, the first year of the Board's existence, three meetings were held, as required by the Financial Services Law. The meetings took place on June 20, September 12, and December 12, 2012. The meetings discussed how Board members could be ambassadors for both promoting and improving the state charter. During 2012, the following six banks converted from federal to state charters:

- Cross County Federal Savings Bank
- Community Mutual Savings Bank
- Fairport Savings Bank
- NorthEast Community Bank
- The Dime Savings Bank of Williamsburgh
- The First National Bank of Jeffersonville

Combined, these banks have assets totaling over \$5.6 billion and deposits totaling over \$4 billion.

Recognizing the Importance of Community and Regional Banks to New York State

Community Bankers Forum. As part of the Department's continued outreach initiative to state-chartered community banks, the Department attended a Community Bankers Roundtable on June 4, 2012, in Buffalo. In addition, the Department held its own Community Bankers Forums on January 23, 2012, in New York City and on May 14, 2012, in Syracuse. In attendance were over 70 CEO's, presidents and senior executives representing 17 state-chartered community banks headquartered in upstate New York, two national banks with New York offices, and M&T Bank. Representatives from the FDIC, the New York Bankers Association, and the New York Business Development Corporation also attended. The Forums included:

- A report on the financial condition of state-chartered community banks;
- A presentation and discussion of accounting issues relevant to community banks;
- A presentation about the State's Banking Development Districts.

This was followed by a frank open forum discussion about the presentations and other community bank issues with the Superintendent and the Banking Division team.

Community Banking Report. During 2012 the Department sought to emphasize the role of community banks within New York State and developed the Community Banking Report to highlight and examine the importance and value of community banks to New York State.

In February 2013, the Department issued its [Community Banking Report](#). The report assessed the significance of community banks to New York's economy, the various trends over the past 20 years in the number of banks, their assets, deposits, branches and profitability and future prospects for community banking in New York given economic conditions, competitive challenges from large banks and regulatory burdens.

Improving Accessibility of Property/Casualty Rate and Form Filings

In April 2012, the Department launched a new application portal that allows the public to search and download insurance company rate and form filings. Making these filings available electronically means they will not have to wait 10 days or more for a Freedom of Information (FOIL) request to be manually processed and mailed. By allowing for the simple download of these filings, the Department has increased transparency and promoted greater efficiency. Easier access to this information may also encourage greater innovation in the insurance industry. The Department receives and processes nearly 3,000 requests for finalized insurer filings annually, so this initiative has helped to drive down the Department's cost of doing business by eliminating the need for the Department to provide paper copies or compact discs to requestors.

Reducing the Cost of Workers' Compensation Premiums

For the first time in four years, New York State employers saw a reduction in workers' compensation premium rates of 1.2 percent, helping New York businesses remain competitive. The rate reduction and the expedited implementation of the reforms are a result of efforts over the past 18 months to modernize, improve efficiency and decrease waste in the workers' compensation system. To create jobs and improve our state's economy, it is essential that New York's businesses remain in a competitive position. This measure to keep rates down is one step that keeps the state on track to create a workers' compensation system that works better for both employers and employees.

PROTECTING CONSUMERS

Storm Sandy Disaster Response

Even before Storm Sandy made landfall on October 29, 2012, the Department prepared to deal with what was predicted to be a major natural disaster. Four months before the storm the Department held training for property/casualty insurance adjusters to obtain certification to conduct adjuster services for policies under the National Flood Insurance Program. The training was to ensure that New York was prepared to respond even more quickly the next time flooding caused serious property damage. Days before the storm struck, the Department alerted insurers that it was likely the Insurance Emergency Operations Center (IEOC) would be activated, and plans were made to issue temporary insurance adjuster licenses so property losses could be inspected as quickly as possible.

In the immediate aftermath of the storm with thousands of people left homeless, nearly two dozen storm-related deaths and entire communities upended from the wind damage and flooding caused by the storm, the Department put in motion a number of responses to help New Yorkers recover. Ranging from community outreach to regulatory actions, those responses included:

- Issuing more than 22,000 temporary adjuster licenses, so insurance adjusters from other states could work in New York and help speed the process of inspecting losses.
- Taking numerous regulatory actions designed to speed recovery efforts, including such measures as enabling homeowners to document losses; temporarily barring insurers from cancelling policies for any reason; cutting the time period for insurers to inspect losses from 15 days to 6 days; and limiting the length of extensions that insurers could request for resolving claims from 90 days to 30 days.
- Declaring that although the standard deductibles used by homeowners to lower their premiums would apply, hurricane deductibles would not apply, thereby saving homeowners potentially tens of thousands of dollars.
- Meeting personally with thousands of homeowners, renters and business owners in more than 150 visits by Department personnel to storm-struck communities, staffing more than 40 disaster assistance centers, and participating in dozens of town hall meetings.
- Operating the IEOC — a joint Department and industry operation staffed by representatives from the Department and insurance companies — as a means of continuously gathering information to assess conditions on the ground and troubleshooting critical insurance issues related to homeowners and others. In addition, the IEOC was used to coordinate the efforts of insurance companies and help insurers process claims more quickly and efficiently for policyholders.
- Staffing a 24/7 storm hotline so homeowners and others could get immediate help in answering their insurance-related questions. The hotline responded to a total of 9,256 calls from consumers in the aftermath of Storm Sandy through December 31, 2012.
- Monitoring the performance of insurers' response to claims by using a set of report cards that enabled the public to see insurance company performance and thereby encourage insurers in a race to the top.

- Urging banks to waive fees for citizens in the 10 hardest hit counties, including fees for late payments, overdrafts and early withdrawals.
- Obtaining agreements from major state-chartered banks and mortgage servicers to offer mortgage payment forbearances.
- Working with insurers, banks and mortgage servicers to expedite advance insurance payments for losses at an accelerated rate so that people could get back into their homes more quickly.
- Working with other state and federal agencies, such as the Federal Emergency Management Agency (FEMA) and the Federal Housing Finance Agency (FHFA), to focus attention on critical issues, which included relaxing rules on mortgage payments so homeowners could recover without undue financial burdens.

Reforming Force-Placed Insurance

The Department launched a major investigation into force-placed insurance, which is insurance placed by a mortgage lender or servicer on a home when the property owner's own insurance is cancelled, has lapsed or is deemed insufficient. The insurance allows the lender to protect its financial interest in the property. However, consumer advocates, mortgage bond investors, and federal investigators alleged that banks and insurers unlawfully place, sell, and reinsure force-placed policies, often at a very high price. Using the Department's new authority to protect consumers under the Insurance, Banking, and Financial Services Laws, the Department issued document requests and subpoenas to mortgage servicers, insurers, and insurance producers as part of an ongoing investigation into force-placed insurance.

As part of its investigation, the Department held public hearings beginning May 17, 2012, in New York City to review whether rates for force-placed insurance are appropriate or excessive. The hearings also examined the relationships and payments among insurers, banks, mortgage servicers and insurance agents and brokers. Fifteen financial services companies were directed to provide written and oral testimony at the hearings and answer the Department's questions. The companies included banks, mortgage servicers, insurance agents and brokers, insurers and reinsurers.

The Department's investigation showed that force-placed insurance premiums cost as much as 10 times more than conventional policies. The investigation also showed a pattern of "reverse competition." Rather than competing by price, insurers were offering lenders a share in the profits when policies were placed, thereby pushing up prices because lenders received incentives for buying policies with higher premiums.

As the direct result of the Department's actions, the two leading providers of force-placed insurance, Assurant Inc. and QBE Insurance Group agreed to pay fines, make restitution to homeowners who were harmed, and reform their business practices. Assurant Inc. was fined \$14 million and QBE Insurance Group was fined \$10 million.

Consent orders require the two insurers to file premium rates with a 62 percent loss ratio, supported by credible claims data and an actuarial analysis acceptable to the Department. The loss ratios, which represent the amount of money paid on claims, will substantially reduce premiums. In addition, the insurers will be required to report loss ratios, earned premiums, itemized expenses, losses and reserves to the Department annually. They will also make refunds to eligible homeowners who were force-placed at any time after January 1, 2008.

The Department's investigation into the issue led to investigations by other state regulators and the Federal Housing Finance Agency, the conservator of Fannie Mae and Freddie Mac, into the conduct of the force-placed insurance business elsewhere in the nation.

In May 2013, the Department reached agreements with the four remaining New York forced-placed insurers: American Modern Insurance, Chubb, Fidelity and Deposit Company of Maryland, and FinSecure. As a result, the Department's force-placed insurance reforms now cover 100 percent of the New York market.

Reducing Health Insurance Costs

Holding Back Higher Health Insurance Premiums. New Yorkers saved more than \$400 million on the cost of health insurance premiums in 2012 because of action by the Department to reduce insurer rate increases. The prior approval law, which was enacted in 2010, requires that insurers obtain the Department's approval before any rate increases take effect. The average rate increase requested by insurers to be effective in 2013 was 12.4 percent. The average premium rate increase approved by the Department was 7.5 percent, an average reduction of almost 5.0 percent and well below the 10 percent rise in health care costs. In implementing the prior approval law, the Department is conscious of the balance that must be struck between keeping health insurance affordable and making certain that insurers have both the resources to pay claims and incentive to continue to serve the market.

In the three years since prior approval has been in effect, the Department has already saved consumers almost a billion dollars. Before prior approval, health insurance premiums were going up an average of 14 percent a year. Each year, the Department has cut the rates requested by insurers.

Premium Refunds. Under the prior approval law, health insurers must spend at least 82 percent of premiums on medical claims. If insurers spend less than that percentage, they are required to return the difference to policyholders. During 2012, several insurers missed this minimum and were required by the Department to refund a total of \$95.6 million to policyholders.

Affordable Care Act Implementation

New Yorkers without health insurance and small businesses wishing to provide coverage to their employees will have a greater opportunity to do so moving forward. Throughout 2012, the Department worked closely with the Governor's Office and the Department of Health (DOH) to develop the New York Health Benefit Exchange (Exchange), which will go into operation on January 1, 2014. The Exchange will offer a choice of reasonably priced health insurance policies where individuals and small businesses will be able to compare rates, benefits and the quality of competing plans in an open and transparent marketplace. The Exchange promises to encourage insurers to offer more competitive prices and plans, providing uninsured New Yorkers the opportunity to obtain coverage at an affordable price. Federal tax credits will be available to help consumers and small businesses pay for coverage. Specific projects the Department worked on are described below:

Exchange Implementation. The Department worked with DOH, Centers for Medicare and Medicaid Services (CMS), and the National Association of Insurance Commissioners (NAIC) to develop the technology and plan management processes required to implement the Exchange.

With the aid of federal grants, the Department worked extensively on policy issues, administrative and technical operations, planning and stakeholder involvement necessary to set up and run the Exchange.

Standardized Model Contract Language. The Department developed, with stakeholder input, standardized health insurance contract language to be used by insurers in the individual and small group markets both inside and outside the Exchange. This will allow consumers, for the first time, to easily shop for and compare health insurance coverage options. The model language will also facilitate efficiencies of operations for insurers and the Department. Along with the model language, the Department prepared form and rate filing instructions and checklists to provide additional guidance to insurers.

Standard Plan Designs. The Department obtained stakeholder input and developed standard cost-sharing and benefits for products that must be offered in the Exchange. This cost-sharing and benefit standardization will allow consumers to conduct comparisons when shopping for coverage on the Exchange. The Department also held actuarial workgroup meetings with stakeholders to discuss the development of the designs and rates for the Exchange.

Essential Health Benefits. The Department and DOH worked together to analyze the essential health benefits in the benchmark plan choices for individual and small group comprehensive medical coverage in accordance with the federal rules.

Brokers and Navigator Certification Process and Training. The Department is developing a certification process for brokers and navigators who will be working with consumers purchasing products on the Exchange. The Department is also developing a training curriculum to help brokers and navigators become certified.

Investigation into Out-Of-Network Medical Costs

Insureds who seek medical services often find unexpectedly that their provider is not within their network. They then face a large out-of-network bill that many cannot afford to pay out-of-pocket. The Department found that unexpected out-of-network medical bills are one of the most common complaints it receives and launched an investigation into these unexpected out-of-network medical costs affecting New Yorkers across the state and surveyed the industry. The Department then analyzed the results and released a report in March 2012 that found that all too often people who try their hardest to stay in-network still get stuck with the most unwelcome surprise, a big out-of-network bill. There is a great need for increased transparency from insurers and medical service providers, and improved consumer protection measures to ensure that New Yorkers stop receiving unexpected bills. The report outlined recommendations for legislative action, and the Department continues to work to implement the following proposed solutions outlined within the report:

Increase disclosure from providers. In non-emergency situations, providers should disclose whether or not all services are in-network before such services are provided and how much they will charge, and insurers should disclose how much they will cover.

Increase disclosure from insurers. Insurers should enable consumers to conduct a meaningful “apples to apples” comparison regarding how much of the cost of out-of-network services will be covered when they are choosing a plan, whether the insurer uses the “usual and customary rate” or the Medicare rate.

Prohibit excessive fees. Out-of-network providers should be prohibited from charging excessive fees for emergency services.

Improve network protections. Network adequacy protections must be improved. Consumers not in HMOs should be given the same network adequacy protections provided to consumers with HMO coverage.

Mortgage Servicing Reform

The Department sought to protect consumers by correcting abuses in the mortgage servicing industry that contributed to the collapse of the housing market and the nation's economic downturn. The Department focused on reforms in the industry by working proactively with consumer groups and the mortgage industry to find ways to improve various aspects of the mortgage foreclosure process.

In September 2011, Ocwen Financial Corporation (Ocwen), one of the largest mortgage servicers, was the first mortgage servicer to agree to the Department's landmark Mortgage Servicing Practices designed to correct robo-signing and other troubling foreclosure and servicing practices that often deprived homeowners of the opportunity to avoid foreclosure.

In December 2012, the Department required Ocwen to hire a monitor to ensure that the company complies with the agreement to reform its mortgage servicing practices after an examination found indications of Ocwen violating the agreement. The examination revealed that, in some instances, Ocwen failed to demonstrate that it had sent out required 90-day notices before commencing foreclosure proceedings or even that it had standing to bring the foreclosure actions. The exam also revealed gaps in Ocwen's servicing practices, including indications that in some instances it failed to provide the required single point of contact for borrowers; pursued foreclosure against borrowers seeking a loan modification; failed to conduct an independent review of denials of loan modifications; and failed to ensure that borrower and loan information was accurate and up-to-date.

Reforming Life Insurers' Claims Practices

As the result of a Department investigation, insurers are now regularly matching life insurance policies against a reliable death list, rather than simply waiting for beneficiaries to file claims. The Department found that many insurers had used the Social Security database to stop annuity payments once a contract holder died, but had not used the same database to determine if death benefit payments were owed to beneficiaries under life insurance policies, annuity contracts, or retained asset accounts.

The beneficiaries of life insurance policies are now receiving the benefits they are entitled to receive because of a Department initiative. The initiative led to new regulations governing how deceased policyholders are identified so that proceeds can be paid to their beneficiaries. Under the new regulations, life insurers in New York must regularly search a federal government list of recent deaths to identify deceased policyholders and then find and pay the beneficiaries of life insurance policies for which no claims have been made.

As of the end of 2012, this initiative led to more than 107,500 payments to beneficiaries throughout the United States totaling nearly \$782 million. In New York alone, 23,200 payments were made to beneficiaries totaling nearly \$232 million.

Hartford Life Returns \$24 Million to Consumers

A Department investigation found that Hartford Life Insurance Company (Hartford) failed to comply with the 60 percent minimum loss ratio (MLR) required under New York Law for plans such as the company's accidental death and dismemberment insurance policies. The MLR, the percentage of premium dollar that must be spent on claims, is designed to prevent insurers from capturing excessive profits. Hartford failed to meet the 60 percent level because it overestimated the amount of money that would be spent to pay claims when the policies were priced by the insurer.

Under the corrective action plan filed with the Department, Hartford will pay \$24 million to approximately 300,000 consumers as well as reduce premium rates for existing and new enrollees by 45 percent.

Providing Relief for Homeowners in Financial Distress

In January 2012, Governor Cuomo announced the creation of the Foreclosure Relief Unit within the Department to develop a coordinated plan to help homeowners stay in their homes and avoid foreclosure where possible. The goal is to give homeowners a real opportunity to obtain a loan modification by receiving help as early in the pre-foreclosure timeline as possible, when the chances for success are greatest. This, in turn, will help stabilize communities.

The Department visited more than 40 communities and provided help to an estimated 1700 homeowners, who received guidance from the Department's foreclosure prevention specialists on issues such as applying for mortgage modifications and help in communicating with lenders. In many cases, the Department interceded directly with banks and mortgage servicers to help financially distressed homeowners.

As part of the program, the Department investigated complaints received from homeowners and often teamed up with U.S. Housing and Urban Development-approved housing counselors to offer assistance to homeowners.

Protecting New Yorkers from Unfair Fees Associated with the Cost of Homeownership & Foreclosure Rights

On November 26, 2012, the Department submitted a comment letter to the FHFA, opposing the proposed rule to increase guarantee fees ("g-fees") on single family mortgages in New York State as well as other states the FHFA labeled as outliers in terms of foreclosure-related costs. The guarantee fee is the fee charged to lenders for the credit risk the Government Sponsored Enterprises (GSEs) take on in owning or guaranteeing a mortgage. The proposed increase in fees does not take into account recent legislation enacted in New York State to protect homeowners and prevent abuses. The Department opposed the proposal on the grounds that it relied on unfair assumptions, would constrain state-level foreclosure policy to the detriment of consumers, sought to shift the backlogs of the GSEs onto prospective borrowers, and could harm the housing market recovery in New York by increasing the cost of home ownership.

Retained Asset Accounts

For many years, the life insurance industry earned money by holding life insurance payouts of America's soldiers, veterans, and others in so-called "retained asset accounts", instead of paying them out to the beneficiary in a lump sum. By doing so, the insurance companies invested and earned interest on these funds, until they are withdrawn by survivors. In many instances, the accounts are not as beneficial to consumers as bank accounts because they are not protected by FDIC insurance, the interest rates are very low, and the accounts often have limitations on check use that do not apply to bank accounts.

When this practice was exposed in the summer of 2010, then-Attorney General Cuomo launched an investigation. Now, the Department has in effect completed the investigation by outlining insurers' obligations to consumers going forward.

In February 2012, the Department issued Circular Letter No. 4, which governs the use of retained asset accounts. The Letter describes new procedures concerning the establishment of such accounts, and encourages insurers to implement best practices for existing accounts. Among other new procedures, insurers should make payment by a single check if a life insurance policy provides for payment of the death benefit in a lump sum and ensure specific disclosures to beneficiaries where the option of a retained asset account is provided. The new standard applies unless the purchaser of the policy or the beneficiary specifically asks to receive the money in another form.

New York is the first state in the country to institute this tough pro-consumer policy, which makes a full payment to survivors the new standard unless individuals expressly choose the option of having a retained asset account.

Consumer Complaints and Recoveries

During 2012, Department investigations into consumer complaints against insurance companies led to the recovery of over \$51 million for 7,216 consumers. The Department also instructed insurers to offer to reinstate 7,078 policies, which had been improperly cancelled.

Department investigations into complaints from doctors, hospitals and other medical providers about unpaid claims led to the payment of \$22.8 million from insurers to these providers.

Maintaining a Competitive Market for Auto Insurance

Motorists are required to have insurance on their motor vehicles. When they are unable to obtain coverage from insurance companies, they are placed in the assigned risk pool, which requires them to pay substantially higher premiums. One sign of the competitiveness of the auto insurance market is the percentage of drivers in the assigned risk pool, which is known as the New York Automobile Insurance Plan (NYAIP).

The number of vehicles insured in the NYAIP has remained at historically low levels and has even decreased by 20 percent at year-end 2012, compared to year-end 2011. Less than 1 percent of New York private passenger registered vehicles are insured in the NYAIP. It had been as high as 17 percent less than two decades ago. The stability in the NYAIP's population can be attributed, at least in part, to various Department initiatives, including incentives to market insurers that voluntarily provide coverage to drivers who otherwise would have been placed in the NYAIP.

INSURANCE DIVISION OVERVIEW

In 2012, the Insurance Division regulated nearly 1,700 insurance companies with assets exceeding \$4.2 trillion. The Division includes the Property, Life and Health Bureaus.

Property & Casualty Bureau

The Property & Casualty Bureau regulates more than 890 property/casualty, mortgage guaranty, financial guaranty and title insurance companies licensed in New York, writing net premiums totaling more than \$338 billion.

The Property & Casualty Bureau oversees the financial condition and market conduct of property and casualty insurance companies in order to monitor the financial solvency of licensees and to maintain an equitable marketplace for policyholders.

The Property & Casualty Bureau's Market Section reviews policy forms and rate filings for all lines of business, including review of workers' compensation, private passenger and public automobile and medical malpractice insurance rates. In addition, the Market Section oversees the American Arbitration Association's (AAA) administration of conciliation and arbitration of no-fault auto insurance claims disputes and is responsible for overall supervision of the excess and surplus lines insurance market, as well as purchasing groups organized pursuant to the federal Risk Retention Act.

The Property & Casualty Bureau's Financial Section conducts examinations and analyses, which includes reviewing and monitoring the financial condition of regulated entities; reviewing mergers, acquisitions and transactions within holding company systems; reviewing applications for licensing of domestic and foreign insurers; reviewing applications for accreditation of foreign and alien reinsurers; reviewing applications to qualify as a certified reinsurer; and reviewing applications for registration as a service contract provider.

Health Bureau

The Health Bureau regulates health insurers with total assets of \$26.5 billion and premiums totaling \$50.5 billion. The Health Bureau has responsibility for all aspects of health insurance regulation, including the premium rates and policy forms; legal aspects of health insurance, including compliance, drafting regulations and legislation; and reviewing discontinuances of health insurance coverage.

The Health Bureau also regulates the fiscal solvency of accident and health insurance companies, Article 43 not-for-profit health plans, health maintenance organizations (HMOs), municipal cooperative health benefits plans and continuing care retirement communities, including review of financial statements and holding company transactions.

The Health Bureau conducts financial and market conduct examinations to ensure compliance with statutory and financial solvency requirements, as well as proper treatment of policyholders. The financial examinations focus on high-risk areas of an entity's operations and include corporate governance, internal controls, current and prospective risk assessment, and review of material transactions.

The Health Bureau also runs the Healthy NY program, the COBRA program and Brooklyn HealthWorks, which provide insurance coverage to vulnerable small businesses and individuals meeting

certain eligibility criteria. In addition, the Health Bureau oversees the Market Stabilization Pools, the Healthy NY Stop Loss Funds and the Direct Payment Stop Loss Funds which are risk adjustment mechanisms for individual, small group and Medicare Supplement coverage.

In addition, the Bureau is responsible for implementing New York's prior approval legislation and works closely with the Governor's Office and the Department of Health on implementing federal health care reform.

Life Bureau

The Life Bureau supervises more than 618 regulated entities, including 133 licensed life insurance companies with assets of more than \$2.5 trillion and premiums of more than \$222 billion.

The 133 life insurers supervised by the bureau include 79 domiciled in New York and 54 foreign domiciled insurers. In addition, the bureau supervises: 37 fraternal benefit societies; 12 retirement systems, including four private pension funds and eight governmental systems; nine governmental variable supplements funds; 330 charitable annuity funds; 22 employee welfare funds; 32 life settlement providers (including six entities permitted to operate as life settlement providers pending approval or disapproval of their applications for licensure and contract forms); 35 accredited reinsurers and eight certified reinsurers.

The Life Bureau regulates financial condition through: the establishment and application of financial standards (risk-based capital (RBC), reserves, accounting, etc.); the periodic examination of insurance companies' financial activities; the evaluation of reserve adequacy and liquidity and other risks; the review of life products for self-support and potentially excessive risk; and the analysis of financial statements and actuarial reports and opinions submitted by regulated entities. Such Bureau processes are performed to verify that statutory and regulatory financial standards are met and to ensure that insurers can meet their financial and contractual obligations.

The Life Bureau regulates market conduct through: the establishment of market conduct standards (product provisions, replacements, claims practices, etc.); the periodic examination of insurance companies' sales and marketing practices and treatment of policyholders; the investigation of specific or targeted market activities; and the analysis of market data. These processes are performed to: ensure compliance with statutory and regulatory requirements; ensure that policyholders are treated fairly and equitably by insurers in accordance with prescribed standards of conduct; and protect the marketplace by preventing and/or limiting practices that constitute unfair trade practices or unfair methods of competition.

The Life Bureau reviews and approves life insurance policies, annuity contracts, funding agreements, and all other agreements and policy forms relating thereto submitted by authorized life insurers and other regulated entities for sale in New York to individual or group consumers for compliance with applicable laws, rules and regulations. Legal and actuarial reviews are performed to ensure that New York consumers receive the protection afforded by New York law and regulations and to ensure that such consumers are treated in a fair and equitable manner by authorized life insurers and other regulated entities.

The Life Bureau regulates the corporate conduct of authorized insurers through: the establishment of corporate standards (corporate governance, holding company, licensing requirements, etc.); the enforcement of statutory and regulatory corporate governance standards; and the review and approval of

activities including licensing, corporate reorganizations, mergers, acquisitions, demutualizations and holding company transactions. In so doing, the Bureau verifies that statutory and regulatory requirements are met; ensures the prudent conduct of insurers; and protects policyholder interests.

BANKING DIVISION OVERVIEW

Community and Regional Banks

Community and Regional Banks (CRB) is responsible for the prudential regulation of community and regional banks, credit unions, and other depository institutions through annual and periodic target examinations and continuous supervision. CRB staff review the compliance of the supervised institutions with applicable New York State and Federal laws and regulations. CRB partners with the FDIC, the Federal Reserve Bank of New York (FRB), and the National Credit Union Administration (NCUA) in joint supervision.

In 2012, CRB had supervisory oversight of a total of 88 banks and savings institutions, including 51 commercial banks, 26 savings banks, 10 limited-purpose commercial banks and one savings and loan association. CRB also provides regulatory supervision for 20 credit unions with total assets ranging from \$1 million to \$1.8 billion, limited purpose trust companies, charitable foundations, bank holding companies, and three New York State regulated corporations. The aggregate assets of institutions supervised by CRB are more than \$248 billion.

During 2012, the economic environment improved along with the outlook for institutions supervised by CRB. No CRB institutions were closed during the year.

Foreign and Wholesale Banks

Throughout 2012, banks from Asia, South America and Europe approached the Department regarding the possibility of opening a branch, agency, or representative office in New York. During 2012, the Department accepted new applications to open foreign branches and representative offices and has issued licenses to such institutions as Banco de Sabadell, S.A and Agricultural Bank of China, Ltd.

The Department continues to meet with representatives from Asia, South America, and Europe to discuss the establishment of foreign banking organizations in New York.

Licensed Financial Services

The Licensed Financial Services Division (LFS) supervises budget planners, check cashers, licensed lenders, money transmitters, premium finance agencies, and sales finance companies. At year-end 2012, the Department had regulatory oversight of 45 budget planners, 166 check cashers, 19 licensed lenders, 76 money transmitters, 56 premium finance agencies, and 96 sales finance companies.

Although improvements in economic conditions were evident in 2012, the consolidation trend witnessed in recent years was still prevalent in many consumer businesses. While the number of licensed entities continued to decline marginally, the network of service providers held steady, with the number of money transfer licensees actually increasing slightly. A positive sign for the industries regulated by LFS is the continued satisfaction of consumers with the overall levels of service provided by each of the respective industries. The industry consolidations have not resulted in any discernible diminished

availability to the varied consumer groups that benefit from the services provided by the regulated businesses.

Mortgage Banking

At year-end 2012, Mortgage Banking supervised 796 registered mortgage brokers and 158 licensed mortgage bankers operating through 168 and 517 branch offices, respectively. Mortgage Banking also has supervisory authority for 25 registered mortgage loan servicers.

FINANCIAL FRAUDS AND CONSUMER PROTECTION DIVISION

The Department's Financial Frauds and Consumer Protection Division (FFCPD) is responsible for combating fraud against entities regulated under the banking and insurance laws, as well as frauds against users of financial products and services including consumers and investors. The Division also investigates consumer complaints and conducts performance evaluation activities in the areas of consumer compliance, fair lending and the Community Reinvestment Act.

The FFCPD encompasses a Civil Investigation Unit, a Criminal Investigation Unit; the Consumer Assistance Unit; Consumer Education and Outreach Unit; a Producer Licensing Unit; a Consumer Examinations Unit; and the Holocaust Claims Processing Office.

As required by the Financial Services Law, the FFCPD submitted its [2012 Annual Financial Fraud and Consumer Protection Division Report](#) on March 15, 2013. Highlights from that report include:

Civil Investigations Unit

The Civil Investigations Unit includes a staff of attorneys investigating civil financial fraud, as well as consumer law, banking law and insurance law violations. In May 2012, the Department held three days of public hearings to probe the inner workings of the force-placed insurance industry and examine its impact on homeowners and investors. Fifteen financial services companies were directed to provide written and oral testimony at the hearings and answer the Department's questions. The Department also heard from experts as well as homeowners who had been force-placed.

The Unit also continued to work on its wide-ranging initiative to reduce consumer insurance costs by stopping deceptive doctors and shutting down medical mills that plague New York's no-fault insurance payment system. Letters were sent to 135 medical providers suspected of possible fraud, requesting basic information that explained their no-fault billing practices, and the Unit conducted hearings to determine whether the providers should be banned from the no-fault system. Additional hearings will be held as the investigation continues.

In other developments, after an examination found indications that Ocwen Financial Corporation was violating the agreement it had entered into in 2011 to reform its mortgage servicing and foreclosure practices. As a result, the Department required Ocwen Financial Corporation to hire a monitor to ensure that the company complies with the agreement. In the wake of Storm Sandy, the Department tracked and analyzed the myriad of consumer complaints filed. In response to emerging trends, the Department opened investigations, including issuing subpoenas, into insurance companies to determine the companies' compliance with New York insurance claims practices laws and regulations.

Criminal Investigations Unit

The Criminal Investigations Unit (CIU) conducts specialized investigations into criminal conduct involving the financial services industry and works cooperatively with law enforcement and regulatory agencies at the federal, state, county and local levels. The CIU which handles banking criminal investigations and insurance frauds, as organized and summarized below:

Banking: The Banking Criminal Investigations Bureau (CIB) conducts criminal investigations into possible violations of federal and state laws and regulations, including the Bank Secrecy Act, federal and state anti-money laundering laws and related regulations, and possible violations of the federal Office of Foreign Asset Control laws and related regulations. Working with local, state and federal law enforcement agencies, the CIB investigates criminal activity within the financial sector involving a variety of financial products. In 2012, the CIB conducted numerous federal, state, county and local mortgage fraud investigations. In 2012 alone, the CIB opened 24 new cases and conducted a total of 63 investigations, which led to 12 convictions.

One of CIB's top priorities is combating mortgage fraud. In 2012, investigations into mortgage fraud led to 21 arrests stemming from cases involving more than \$27.5 million in losses to victimized homeowners and financial institutions.

Insurance: The Insurance Frauds Bureau (IFB) recorded 595 arrests during 2012, with arrests for health care fraud (private health care, no-fault and disability) totaling 195. The number of convictions obtained by prosecutors in IFB cases totaled 382 for the year. In addition, the IFB received 24,038 reports of suspected fraud in 2012; no-fault fraud accounted for 13,944 or 58 percent. Court-ordered restitution totaled \$18 million for the year. The IFB opened 841 new cases for investigation statewide in 2012.

IFB's top priority remains the no-fault initiative, focusing on investigations involving staged accidents and fraudulent billing by medical mills. Referrals alleging no-fault fraud have accounted for more than 50 percent of all fraud referrals since 2007.

Consumer Assistance Unit

The Consumer Assistance Unit (CAU) is responsible for receiving, investigating and resolving consumer complaints involving insurance and banking issues through informal mediation and negotiation. In addition, the Financial Services Law gave FFCPD authority over unregulated financial service providers, such as debt collectors, debt settlement companies and unregulated products such as illegal internet payday loans, prepaid debit cards, financial products offered by retailers, and student loans. CAU is training staff to handle complaints concerning these and other "gap" products and service providers.

In 2012, the CAU received and opened 37,273 new complaint files; the unit processed and closed 24,936 insurance complaints and handled 1,813 insurance-related inquiries, and received a total of 1,479 written non-mortgage related banking complaints, referrals and inquiries.

CAU recovered \$51,170,158 for 7,216 consumers, which included refunds from insurers, reinstatement of lapsed coverage, payment for denied medical claims, and coverage of disaster-related claims that had been previously denied. The Department also instructed insurers to offer to reinstate 7,078 policies.

Producer Licensing Unit

The Producer Licensing Unit reviews applications, issues licenses and processes renewals for insurance companies as well as licensed producers, including agents, brokers, adjusters, bail bond agents, life settlement brokers, providers and intermediaries. In 2012, the Producer Licensing Unit issued 195,266 licenses. The Producer Licensing Unit also monitors, approves and audits courses, instructors and providers for education and continuing education.

Consumer Examinations and Community Development Unit

The Consumer Examinations and Community Development Unit (CEU) ensures that regulated institutions abide by the state Fair Lending and Community Reinvestment Act (CRA) regulations, works to increase consumer access to traditional banking services in under-served communities by effectively administering the Department's Banking Development District (BDD) program and other community development initiatives, and aligns FFPCD's examination and enforcement activities with those of the Department's federal counterparts.

Consumer Examinations: In 2012, CEU conducted 18 CRA performance evaluations, 26 consumer compliance examinations, and 28 fair lending examinations, and reviewed approximately 70 fair lending plans – 50 for the Mortgage Banking Division and 20 for the Licensed Financial Services Unit. As a result of the consumer compliance exams, all depository institutions have been required to develop and maintain a Compliance Management System (CMS). The examinations revealed that several depository institutions were subject to regulatory risk resulting from failing to incorporate into audit programs, training and policies all of the applicable New York State laws, regulations and supervisory procedures. The examinations also uncovered objectionable practices in regard to basic banking, maximum charges on returned items and imposition of higher service charges on inactive (dormant) accounts than on savings accounts. Consequently, CEU is pursuing restitution for affected consumers. CEU also commenced a process to require all depository and non-depository institutions to develop a tracking mechanism to indicate the military status of their consumers.

Community Development: In 2012, CEU continued to address significant consumer issues. The Department participated in a number of collaborative community development efforts in the state including Bank on Manhattan and the New York State Coalition for Excellence in Homeownership Education. CEU also continued to participate in the At-Risk Multifamily Building Data Sharing Initiative with NYC Housing Preservation and Development. In the aftermath of Storm Sandy, Community Development staff worked with the CRA team as well as representatives from the FDIC, OCC and Federal Reserve Bank of New York to hold a forum for banks and community development financial institutions on current efforts to rebuild. The forum included panels on economic development, neighborhood revitalization and affordable housing, as well as a regulatory panel on CRA eligibility.

Holocaust Claims Processing Office

The Holocaust Claims Processing Office (HCPO) was created in 1997 to help Holocaust victims and their heirs recover assets deposited in banks, unpaid proceeds of insurance policies issued by European insurers, and artworks that were lost, looted or sold under duress. The HCPO accepts claims for Holocaust-era looted assets from anywhere in the world and charges no fees for its services. From its inception through December 2012, HCPO has responded to more than 13,000 inquiries and received

claims from 4,912 individuals from 45 states, the District of Columbia and 39 countries. HCPO has successfully closed the cases of 2,125 individuals in which either an offer was accepted, the claims process to which the claim was submitted issued a final determination, the assets claimed had been previously compensated via a postwar restitution or compensation proceeding, or otherwise handled appropriately (i.e. in accordance with the original account holders' wishes). The claims of 2,787 individuals remain open.

The combined total of offers extended to HCPO claimants for bank, insurance, and other asset losses amounts to \$163,323,369 and a total of 64 cultural objects have been restituted. The [2012 HCPO Annual Report](#) is available on our website.

CAPITAL MARKETS DIVISION OVERVIEW

The Capital Markets Division provides the Department expertise in capital markets (bonds, equities, credit, derivatives, commodities), Enterprise Risk Management, financial analysis, IT, internal controls and audit, research, fiduciary controls, regulatory accounting, Bank Secrecy Act and anti-money laundering. Capital Markets assists other Divisions in examinations and also conducts target examinations independently. The Division has the primary regulatory responsibility for the New York State based public retirement systems and financial guaranty insurance companies.

REAL ESTATE FINANCE DIVISION OVERVIEW

The Real Estate Finance Division is responsible for regulating all real estate and homeowner issues, ranging from mortgage origination and servicing to title and mortgage insurance to the foreclosure crisis. In addition, the Division in late 2012 became the clearinghouse for Storm Sandy response operations, assisting homeowners whose lives were upended by the storm.

LIQUIDATION BUREAU OVERVIEW

The New York Liquidation Bureau (NYLB) is the office that carries out the duties of the New York Superintendent in his capacity as receiver of impaired or insolvent insurance companies under New York Insurance Law Article 74.

The NYLB receives no funding from the State budget; rather, its costs are paid from the assets of the estates under receivership, as well as expense reimbursements from the New York Property/Casualty Insurance Security Fund and the Public Motor Vehicle Liability Security Fund, established under Insurance Law Article 76, and the Workers' Compensation Security Fund, established under New York Workers' Compensation Law Article 6-A, which are paid from assessments on industry.

For each estate, the Superintendent is appointed Receiver by the Supreme Court of the State of New York. Thereafter, the Receivership Court approves the actions of the Receiver and, by extension, the NYLB.

In 2012, the Bureau distributed a record \$345.6 million in estate assets to insurance policyholders, claimants and creditors, while also significantly reducing the number of outstanding policyholder claims by nearly one-third.

Acting as an agent of the Receiver, the NYLB maximizes the assets and resolves the liabilities of the estates. The goal is to rehabilitate the companies and put them back into operation or, if that is not possible, liquidate them in order to distribute their assets to policyholders and creditors. In addition, the

NYLB performs claims-handling and certain payment functions relating to the Security Funds. The Security Funds pay eligible claims remaining unpaid if an insolvent insurer does not have sufficient assets to meet its obligations to policyholders.

As of December 31, 2012, the Bureau was managing sixty-four insurance company proceedings. During 2012, five new proceedings were commenced, of which three were domestic liquidation proceedings (Bakers Mutual Insurance Company, Autoglass Insurance Company and Frontier Insurance Company); one was a rehabilitation proceeding (Financial Guaranty Insurance Company); and one was an ancillary proceeding (First Sealord Surety, Inc.).

During 2012, fifteen receivership proceedings were completed, of which three were domestic liquidation proceedings (Horizon Insurance Company, MDNY Healthcare, Inc. and Health Partners of New York, LLC); eight were shell liquidation proceedings (Aspen U.S. Insurance Company, Atlantic Liberty Insurance Company, Austin Liberty Insurance Company, Axel Insurance Company, Madison Insurance Company, Inc., Majestic Insurance Company of New York, MBL Property & Casualty Insurance Company and National Heritage Title Insurance Company); three were conservation proceedings (HIH Casualty & General Insurance Limited, Pacific and General Insurance Company Limited and Reliance Insurance Company of Illinois); and one rehabilitation proceeding was converted to a domestic liquidation proceeding (Frontier Insurance Company). There were no ancillary receivership proceedings completed in 2012.

LEGISLATIVE RECOMMENDATIONS FOR 2013

Core Mission (Insurance and Banking). These bills update the statutory framework for the regulation of the insurance and banking industries and related entities subject to the jurisdiction of the Department. These bills demonstrate the ongoing commitment of the Department to update the statutory framework for the regulation of entities subject to its jurisdiction.

Commercial Modernization. Insurance Law §6303(a) exempts certain policies issued to a “large commercial insured” from rate and form filing requirements until June 30, 2013. This bill extends the sunset date of this exemption to June 30, 2015 to continue the expanded ability of New York-authorized insurers to compete more effectively with the London and out-of-state markets.

The Department is also continuing to work on strengthening consumer protections on gift cards and general purpose reloadable (GPR) prepaid cards, minimizing the disruption that results from discontinuance of certain health insurance plans, and providing protections for whistleblowers who report misconduct by financial services entities.
